Full stack Ruby on Rails developer with professional experience across the complete development life cycle of the worlds largest hospitality job board. In addition to proficiency in Ruby on Rails, JavaScript/Jquery and experience in React/Redux, I bring strong interpersonal, public speaking and communication skills, experience managing teams and extensive knowledge in breaking down problems into their component parts.

TECHNICAL SKILLS

- HTML, CSS, JavaScript, jQuery, Ruby, Ruby on Rails, SQL/MYSQL, React, Redux,
- Command Line, Git Version Control, IDE's, Atom, Heroku, Clubhouse, Jenkins, Searchkick

EMPLOYMENT HISTORY

Hospitality Online, Seattle, Washington

Ruby on Rails Developer, *July 2019 - present*

Full stack ruby on rails developer working in a small agile development team, building and maintaining the largest hospitality job board in the world with over 2 million members and over 20 million site visitors annually.

- Designed and built custom job sites and employee onboarding software for some of the largest hotel management companies in the world.
- Built a number of new features, including customer facing products, tools for sales and admin staff and developer tools.
- Responsible for collating data from a large number of sources including API's and custom built scrapers, predominantly with Nokogiri and HTTParty, for building new sites and to increase the number of opportunities available to users.
- Increased test coverage across entire app, writing hundreds of new tests using Capybara and RSpec.

Assisted in training new junior developers and interns in best practices and in conducting code reviews.

West Australian Police, Perth, Western Australia

First Class Constable, *November 2011 - January 2019*

Former Police Officer with seven years of experience in investigation, crime prevention and building relationships within a diverse community.

- Led a team as acting Sergeant of seven officers with responsibilities ranging from managing crime scenes and active incidents to preparing court paperwork and rostering.
- Experienced working long hours in very high stress environments whilst maintaining efficiency and productivity.
- Responsible for safety and training of junior officers for over 4 years.
- Well trained in conflict resolution, including interviewing, active listening, mediation and problem solving.
- Emphasis on time management and responsibility for reaching goals and milestones.
- Skilled in public speaking to various groups including, team briefings, presenting evidence in Supreme Court, managing crowd control incidents and leading tour groups.

EDUCATION

Software Engineering - Seattle, Washington - 2019
